

MOSSBURN

Community Response Plan

Southland has NO Civil Defence sirens

(fire brigade sirens are not used to warn of a Civil Defence emergency)

Please take note of natural warning signs as your first and best warning for any emergency.

Mossburn Community Response Plan 2022

Find more information on how you can be prepared for an emergency

www.cdsouthland.nz

If you'd like to become part of the Mossburn Community Response Group

please email ems@cdsouthland.nz

In the event of an emergency, communities may need to support themselves for up to **10 days** before assistance arrive.

Community Response Planning

The more prepared a community is, the more likely it is that the community will be able to look after themselves and others. This Plan contains a short demographic description of Mossburn, information about key hazards and risks, information about Community Emergency Hubs where the community can gather, and important contact information to help the community respond effectively. Members of the Mossburn Community Response Group have developed the information contained in this Plan and will be Emergency Management Southland's first points of community contact in an emergency.

Demographic details

Mossburn is an agricultural support town in northern Southland. It sits in the Oreti FMU and within the Mararoa/Waimea Ward of the Southland District.

Mossburn is the Deer Capital of New Zealand, as it is one of the pioneering locations for deer farms when live deer recovery began in Fiordland in the 1970s;

- Mossburn has a population of approximately 210 and the town services a total population of about 3000;
- Mossburn is primarily an agricultural support town with employment in 'agriculture, forestry and fishing' being the largest industry by far;
- tourism for the town is significant with Mossburn being a stopping point for tourist traveling between Te Anau and Queenstown. As well as the Around the Mountain Cycle Trail which goes through Mossburn;
- the town has no medical centre or pharmacy (closest being Lumsden, Gore or Winton). The closest police and ambulance stations are in Lumsden. There is local fire brigade who are very active in the community;
- the broad geographic area for the Mossburn Community Response Plan includes Hamilton Burn, Acton, West Dome, and the backcountry up to Jane Peak, see map below for a more detailed indication;
- this is not to limit the area but to give an indication of the extent of the geographic district. Flexibility needs to be maintained considering that a specific disaster may render existing geographical boundaries irrelevant.

Hazard and Risk information

Potential hazards and risks for the Mossburn area include:

Earthquake

- Fiordland region has frequent earthquakes and like much of the South Island, Mossburn would be affected during an Alpine Fault earthquake. The most likely impacts for Mossburn would be loss of lifelines, causing isolation with damaged buildings, roads, likely loss of communications, water supply, sewage and power. It could cause changes to the natural environment creating slips and affecting roading and possibly affecting waterways and underground water sources.

Flooding

- Mossburn has been affected historically by flooding, including the 1978 and 1984 floods with the Oreti River running through the district. Bridges are vital infrastructure that also carry telecommunications, water and other services across rivers, these could also be impacted by flooding. Many areas in the community rely on bridges to connect with homes and employment this leads to isolated communities.

Agricultural and biosecurity

- Mossburn plays a role as a service town to the agricultural industry. With 1.5 million hectares of farmland in Northern Southland, any impacts to livestock or for land use could have major economic and health impacts especially around psychosocial impacts.

Road Infrastructure damage

- Mossburn is situated on State Highway 94 and is a main thoroughfare for tourists traveling between Te Anau and Queenstown. The town provides industry and goods to surrounding areas. Anything that may impact the delivery of goods to service the area needs to be considered.

Identified potential vulnerable sub communities

- Schools: Mossburn School (approx. roll 50)
Mararoa School (approx. roll 50)
- Home based childcare providers;
- Elderly in the community;
- Rurally isolated people including migrant employees;
- People with disabilities;
- People with high risk medical conditions – the DHB can source this information if needed.

Community Emergency Hubs

Community Emergency Hubs provide pre-identified places where the community can gather in the event of an emergency. Not all Hubs will be suitable during an emergency, and it is up to the community to decide at the time. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort and information.

Each pre-determined location will be provided with a hub guide and be able to access advice from Emergency Management Southland if they require further information or support.

In Mossburn, Community Emergency Hub locations identified by the community are:

- Mossburn Community Centre; 9 Holmes St, Mossburn
- Mossburn Hotel; 16 Yorke St, Mossburn
- Farmlands; 12 Bath St, Mossburn

Don't forget, if you are opening a hub it might pay to think about bringing some basics, such as:

- Water
- Tea and coffee
- Milk and biscuits
- Toilet paper
- First aid kits
- Torches

Community Response Groups into Recovery

Community Response Groups will be vital during the recovery of a community. They will be able act as a connection between the community and the recovery team. They will have key local knowledge and understand the effects of decisions on the local community. They will be able to identify areas of the most importance to the community and suggest ways to work towards the communities' end goals. The process around community recovery will be described in greater depth in the Southland Recovery Plan.
